IPhone Video MPEG-4 option is ordinary Conversion,which need a short time.

H 264 is HD conversion,which need a long time.

640\*480 is video size

MP4 is video format

Because I just try the both conversion H264 and MPEG-4 converting to other formats by the quality of the film do not know,so I never make any evaluation for this, please forgive!

Path to default output ...pavtube\ Video\_Converter\ You can also change the output path of your choice.

If you import file too big,In the course of it is best not to use computers, and converting will be a longer time, please wait patiently.

After the conversion is complete, there will be tips.

Then, you can you enjoy them anywhere and anytime.

Hope that all the members will have dedicated themselves to the mass of the film to share with your joy!
