Step by step guide to convert DVD AVI WMV MOV RMVB DivX Youtube DAT to iPod/iphone

Part 1. How to rip encrypted DVD movie to iPod/iPhone?

<http://www.welldownload.com/convert-iPod-video.html>

Part 2. How to convert AVI/WMV/Divx/xvid/MPG/MPEG/MOV/DAT/ASF/RM/RMVB to iPod/iPhone?

<http://www.welldownload.com/video-to-iphone2.html>

Part 1. How to convert iPod video, such as AVI to iPod, WMV to iPod, MPEG to iPod, RM to iPod, RMVB to iPod, ASF to iPod, MPG to iPod, DivX to iPod, XviD to iPod video using "cucusoft iPod Video Converter + DVD to iPod Suite". (Windows)

1. Download the latest version at

<http://www.welldownload.com/convert-iPod-video.html>

and install it. You can download about it by referring here

Related download

\* To convert RM/RMVB real media files to iPod, Maybe need to install Realplayer:

<http://www.real.com/freeplayer/?rppr=rnwk>

\* To convert WMV, ASF to iPod, Maybe need to install Windows Media Player:

<http://www.microsoft.com/windows/windowsmedia/default.msp>

2. Run iPod Video converter component. And load the video files you'd like to convert by clicking 'Open file' button

[http://www.welldownload.com/convert-iPod-video\\_clip\\_image001.jpg](http://www.welldownload.com/convert-iPod-video_clip_image001.jpg)

Click 'Output' and choose the pathname where you want to save your video files. Click 'Convert' to start converting video to iPod MP4 or H264 files.

Tips: Before converting, you can click 'Advance -> Video settings' to set 'Video format', 'Resolution', 'Framerate', 'Output Quality'. If you'd like to convert video to H264 files, please set 'Video format' to 'H.264 FQ Variable Bitrate'.

'MPEG4(.mp4) FQ Variable Bitrate' is the default value. Certainly, you can also set 'Audio Bitrate', 'Channels', 'Sample Rate' and 'Volume' in 'Audio Settings' page.

[http://www.welldownload.com/convert-iPod-video\\_clip\\_image002.jpg](http://www.welldownload.com/convert-iPod-video_clip_image002.jpg)

As usual, we set "Resolution" as "320x240" (i.e. default settings), certainly you can also choose other video sizes you like.

3. After converting, you can open the output folder to check and play the iPod video files (.mp4 or .mov) using Quicktime Player (Freeware, Quicktime Player+iTunes downloading address <http://www.apple.com/quicktime/download/win.html> ).

4. Transfer the iPod videos to iTunes by dragging or clicking "File -> Add File to Library". Now, you can enjoy them on iTunes. Then hit "File -> Update iPod" to sync to your iPod.

Troubleshootings (Windows)

1. Why occur a message: 'MPEG2Dec: Error during decoder initialisation' or 'unable to read from E:\VIDEO\_TS\mts\_01\_1.vob' everytime I put any DVD in?

Check that you select the correct DVD driver. If not, please select the correct DVD driver path.

2. Audio is out of sync with the video or no audio

There are several posts which says audio is out of sync with the video or no audio at all when they used videora ipod converter, cucusoft dvd to ipod converter or pqdvd dvd to ipod video converter. It seems that there is no software can work well for ALL users and ALL DVDs.

In fact, you might as well resolve the problem trying the following one by one.

A. DVD to iPod Converter: Click "Setting -> Input settings".

(a) Check "Audio/Video Synchronisation".

(b) Set "Deinterlace filter" to "None".

(c) Set "Output frame rate" to other values.

B: iPod Video Converter: Click "Advance", change 'framerate' to 23.976 or 29.97 in 'Video settings'.

If it doesn't work, might as well change a DVD movie to test.

3. Still doesn't Work

iPod official support page: <http://www.apple.com/support/ipod/>

iTunes official support page: <http://www.apple.com/support/itunes/>

Part 2. How to convert AVI/WMV/Divx/xvid/MPG/MPEG/MOV/DAT/ASF/RM/RMVB to iPod/iPhone?

Download 'Wondershare iPhone Video Converter from here

<http://www.welldownload.com/video-to-iphone2.html>

Step 1. Load Files

Click the Add button to load video files, see that little triangle to the right of the ADD button, if you want to load video files of Mov, Flv, Mp4 and M4v format, you can choose the Add Directshow files option, and the software will encode the files

---

by Directshow encoding method (an advanced encoding technology).

Step 2. Set output settings.

Choose the output format, take iPod for instance, you can choose the iPod Video H.264 option. There are many pre-set options available. So you don't have to worry about which video format that your portable media player supports.

Step3: Start Conversion

Click start button to convert the video if you are satisfied with the original video effects. Then you can just have a cup of coffee or take a walk till the conversion is finished.

Tip1:

You can adjust the video effect by clicking the effect button. You can adjust the Brightness, Contrast, Saturation. And you can also make the video look like an old film using the pre-set Old Film video effect and adjust the audio volume.

[http://www.welldownload.com/video-to-iphone2\\_clip\\_image002.jpg](http://www.welldownload.com/video-to-iphone2_clip_image002.jpg)

Tip2:

If you just need to cut off some parts of the video, you can use the trim function. Drag the two triangles to set the start time and end time to define the output clip.
